

## **LGF Sock**

This yarn actually took my mother and I the longest to perfect! To find the right blend of the of the right wool and the right amount of nylon (but not too much)! When we thought we had it just right we each knit ourselves a pair to wear to the barn! 2 years later and neither of us has worn through our socks!

But this yarn is also soft and airy and knits up beautifully as shawls, hats, cowl or mittens!

This yarn is a blend of 55% suri, 30% corriedale and 15% nylon.

All fibers used are U.S. sourced and ethically raised.

Needle size varies widely depending on the project. US 1-2 for socks with a gauge of 9-10 stitches per inch. For shawls etc. US 3-6 depending on the pattern requirements.
